MEET OUR PROPRIETARY AI MODELS

First AI Model

Built and trained to predict client profitability after just **10 trades** with 93% accuracy, suggesting A/B-book allocation.

Second AI Model

Analyzes the last **50 trades** and determines if trading patterns have shifted to risky or low risk trading. Then it suggests book reallocation if necessary.

Third AI Model

Predicts when a client is most likely to trade each day, based on their historical behavior and trading data. It identifies a precise time window for expected activity enabling precise monitoring and timely decision-making.
