

Empowering Your Business with AI

WELCOME TO AIBI.GLOBAL

Our mission is to simplify complex data, optimize your workflow operations, and give you the tools you need to stay ahead of market changes.

Your Guide
in Navigating Financial Challenges

WHO WE ARE

AIBI.Global provides proprietary **AI technology** designed for brokers and prop firms, with solutions tailored to meet your unique needs.

Tailored to Your Needs

We focus on **understanding** your specific **challenges** and customizing our tools to address them, ensuring they fit seamlessly into your operations.

Industry Experts

Built on years of experience serving brokers and prop firms, we refine our technology to deliver **real-time trader behavior analysis** and **automated abuse detection**, empowering smarter internal decision-making while keeping full control in your hands.

Proprietary AI Technology

Our cutting-edge **AI system** is designed specifically for the financial sector, providing powerful insights and **accurate forecasts** to help you make smarter business decisions.

Turn Data into Actionable Insights

UNLOCK THE FULL POTENTIAL OF YOUR DATA

AI Insights

Make **data-backed decisions** with clear, accurate AI forecasts that are tailored to your business needs.

In-Depth Analytics

Get **in-depth analytics** that surface risks and opportunities instantly, without digging through endless reports.

Predictive Analytics

Stay ahead by using our tools to **predict trends and outcomes**, helping you make smarter moves faster.

Real-Time Data

Stay aware of **every shift** with real time, automated data covering all key areas of your business.

FIND THE PERFECT FIT FOR YOUR BUSINESS

Coming soon

AIBI SPARK

For brokers with up to 500 active accounts

- Easy onboarding
- Core dashboards
- Metabase delivery
- Affordable entry
- Seamless upgrade path - move to Jet anytime

Best for:

Growing brokers and prop firms who want enterprise-grade analytics at a lower entry point, with the flexibility to scale later.

AIBI JET

Built for scaling globally

- Instant platform-wide updates
- Custom reports and automation add-ons
- Unlimited scale
- Power BI and Metabase dashboards
- Platform-agnostic integration
- Role-based access controls

Best for:

Mid-to-large brokers & prop firms seeking deep insights, full control, and enterprise-level scalability.

CHALLENGES WE SOLVE

Workflow hurdles slow decision-making, increase errors, and hinder growth. Here's how we solve these challenges.

⚠️ Wrong Decision-Making

⚠️ Manual Work

⚠️ Disconnected Systems

⚠️ Lack of Automation in Client Management

⚠️ Inefficient Risk Management

⚠️ Low Sales

⚠️ Loss of Clients

⚠️ Limited Analytics

ANALYTICS SYSTEM

THE CORE ANALYTICAL FRAMEWORK

BEHIND **JET** and **SPARK**

The Analytics System is the **core analytical framework** powering both JET and SPARK. It includes over 15 interactive reports covering trading activity, risk exposure, performance trends, and behavioral analytics.

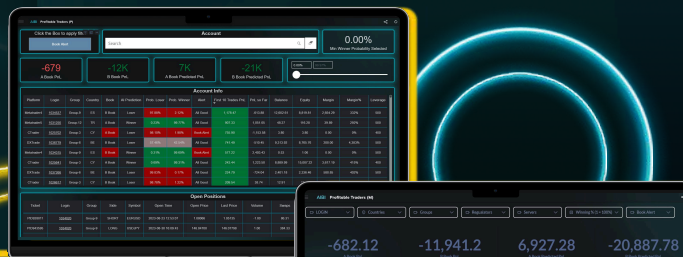

Alongside these reports, the platform also features a **dedicated AI-powered forecasting module** for early trader performance prediction - helping firms make faster, more accurate decisions on **risk management and A/B-book allocation**. This unified foundation enables brokers and prop firms to reduce risks, optimize operations, and grow profitability on both product tiers.

**15 +
reports**

Profitable Traders (AI Winners)

This **AI-powered report** predicts long-term trader profitability with over 93% accuracy after just 10 trades and detects behavioral shifts based on the last 50 trades helping firms make smarter allocation and risk management decisions.

Account History

The Account History report gives a clear behavioral view of each trader, showing equity evolution, performance by instrument, activity patterns, and full trade history. It helps **risk and dealing teams assess consistency, spot emerging risks, and understand how a trader's style develops over time supporting more informed and timely decisions.**

Abuse Detection Reports

Abuse Detection reports identify a wide range of toxic trading behaviors by analyzing profit-per-second spikes, unusual profit distributions, and ultra-short high-impact trades. This enables the system to catch scalping, ambiguous and non-standard profit patterns, latency-style behaviors, and other hidden manipulative strategies giving firms early visibility and preventing avoidable losses.

Margin call

Provides real-time tracking of client balance changes, highlighting accounts that require immediate attention. Enabling you to **act quickly and prevent an account closure**

Live Exposure by Pair

See your **pair-level exposure** in **real time** with a clear view of where positions are building up. Spot **unusual activity fast**, filter by group or symbol, and **take action right away** — hedge, rebalance, or contain toxic flow before it hits performance.

Live Exposure by Asset

Keep track of **asset exposure** as it shifts throughout the day. Get an instant read on **currency imbalances**, catch **pressure points early**, and use filters across groups or servers to zero in on what needs attention. Make **quick adjustments** to keep your book protected.

Case Study 1

FROM PRE-LAUNCH TO **\$4M+** MONTHLY REVENUE

⚠ CHALLENGE

A proprietary firm required help in launching their business.

📋 OUR SOLUTIONS

- Implemented a reporting system with advanced analytics.
- Became their strategic partner, supporting internal operations and team workflows, adding to missed upgrade revenue.

💡 THE RESULT

- Reached **\$4M+** monthly revenue in just **2 years**
- Helped draft operational documentation
- Returned to us to launch a second brand

Case Study 2

SUPPORTING RISK TEAMS AGAINST ABUSIVE TRADING

⚠ CHALLENGE

Even brokers with in-house risk teams struggled to spot abusive trading in large data volumes. Manual monitoring missed toxic scalpers and abnormal profit patterns, quietly damaging P&L.

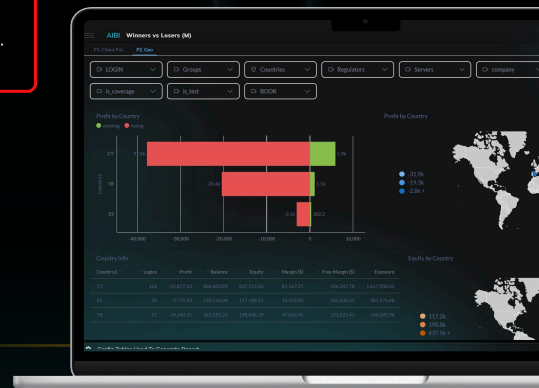

📋 OUR SOLUTIONS

- Connected brokers to the analytics system with Abuse Detection reports.
- Provided dashboards that highlight scalpers, PnL-per-second spikes, and abnormal profit patterns.
- Enabled risk teams to detect suspicious accounts early and prevent losses.

💡 THE RESULT

Even brokers with in-house risk teams struggled to spot abusive trading in large data volumes. Manual monitoring missed toxic scalpers and abnormal profit patterns, quietly damaging P&L.

- **+\$448K saved**
by stopping scalpers and ambiguous abuse patterns.
- **+\$7K saved (small broker)**
even with a small client base, toxic behavior was identified and removed early.

Case Study 3

WHEN ACCURATE DECISIONS MEAN REAL PROFIT

⚠ CHALLENGE

The firm couldn't accurately assess trader skill early in the evaluation process. Strong traders were being overlooked, while weak or inconsistent traders advanced into funded accounts - creating unnecessary payout liabilities and capital losses.

📁 OUR SOLUTIONS

- Enabled the **Profitable Traders** report with our AI model predicting trader profitability after the first **10 trades**.
- Used AI to track **behavior shifts** based on the **last 50 trades**.
- Provided a **unified view** for risk, evaluation, and funding teams.

💡 THE RESULT

• **+1.94M Net Profit**

Achieved through improved funding decisions and better identification of high-value traders.

Case Study 4

BOOSTING TRADER RETENTION WITH SMART REPORTS

CHALLENGE

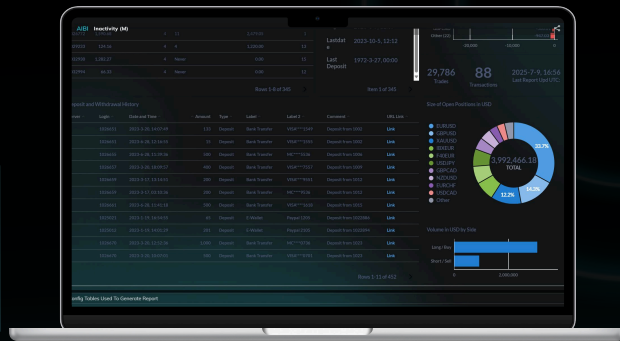

A prop firm was losing traders during evaluation and funded phases, with no clear visibility into who could return or be reactivated.

OUR SOLUTIONS

- Added the Inactivity Report to identify promising traders likely to return.
- Used the Margin Call Report to spot at-risk accounts early.
- Provided insights to focus on traders with the highest retention potential.

THE RESULT

- 63% trader retention** over six months — **13pp** higher than similar prop firms
- 57% of inactive traders returned**, improving evaluation and funded-phase continuity
- Trader activity became **more stable and predictable**, reducing unnecessary churn.
